

Shopora Space

Vendor Launch Guide

Welcome to your new online space.

Thank you for choosing Shopora Space to take your business online. This guide will walk you through everything you need to know to set up your store, add your products, receive orders, and get your store ready for customers.

1. Choose Your Shopora Package

Before creating your store, select the package that works best for your business (monthly or yearly). Your subscription gives you access to your Shopora store and vendor dashboard. You'll also receive a 7-day free trial when you start.

2. Create Your Account

After selecting your package:

1. Create your Shopora account.
2. Enter your business information.
3. Choose your store name.
4. Complete your registration.
5. Access your vendor dashboard.

Your store will have its own Shopora address: `yourstorename.shopora.space`

3. Set Up Your Store

From your vendor dashboard, add your business information. Make sure you add:

- Business/store name
- Logo
- Store description
- Contact information
- Social media links
- Store location
- Business hours, if applicable
- Store banner/cover image

Tip: Keep your branding consistent so your storefront looks professional.

4. Add Your Products

Add the products you want customers to see in your store. For each product, include:

- Product name
- High-quality product photos

- Price
- Product description
- Category
- Available quantity
- Sizes or variants, if applicable
- Product options, if applicable

Tip: Use clear, well-lit product photos and accurate descriptions. This helps customers feel confident when shopping.

5. Organize Your Store

Create product categories so customers can easily find what they're looking for. For example:

- Fashion: Dresses, Tops, Trousers
- Beauty: Wigs, Hair, Skincare
- Accessories: Bags, Shoes, Jewelry

Choose categories that make sense for your business.

6. Set Your Delivery & Store Policies

Before launching, make sure customers know how your business handles orders. Add your:

- Delivery options & Delivery fees
- Delivery areas
- Pickup information, if available
- Processing times
- Return, Refund, and Exchange policies

Be clear and transparent so customers know what to expect.

7. Set Up Customer Payments

Shopora provides the online storefront and order management system. Your customers will place their orders through your Shopora store.

Make sure your preferred payment instructions are clearly available to customers so they know how to complete payment for their order.

Important: Always confirm that payment has been received before processing an order.

8. Customize Your Store

Make your storefront feel like your brand. You can customize your store with your Brand logo, Brand images, Product photos, Store description, Categories, Contact information, and Social media links.

Your Shopora store should feel like an extension of your existing business.

9. Preview Your Store

Before sharing your store with customers, preview it as a customer would. Check: Product images, Prices, Product descriptions, Categories, Contact information, Delivery information, Payment instructions, Store branding, and Mobile appearance.

10. Launch Your Store

Once everything is ready, your store can go live. Share your unique store link with your customers: `yourstorename.shopora.space`

You can add it to: Instagram bio, TikTok bio, WhatsApp, Facebook, Business cards, Flyers, and other marketing platforms.

11. Managing Your Orders

When a customer places an order, you'll be able to view it from your vendor dashboard. Keep your order status updated so customers know what is happening with their purchase.

12. Managing Your Products

Your vendor dashboard allows you to keep your store up to date. Remember to update prices, update product availability, add new products, and remove unavailable products.

13. Your 7-Day Free Trial

When you create your Shopora store, your 7-day free trial begins. After your 7-day trial ends, your selected Shopora package will need to be paid for to continue using the service.
